

ARMSTRONG 

**ASTRO EXPRESS 2
SYSTEM**

**INSTANT HOT WATER
AT EVERY TAP**

A quality product that will not have you running back to your customers for adjustments and repairs!

WATER SAVINGS

- Hot water recirculation with instant hot water at the tap reaps an average annual water savings of 12,000 gallons (based on a family of four spending over 90 hours per year waiting for hot water to arrive at the tap).

EASY AND QUICK SET UP

- Unique valve design for individual adjustment to specific installation needs (only such system currently available).
- Factory tested and pre-wired for maximum installation safety and convenience.
